

DERMALIVE CLASS ACTION SETTLEMENT

The Settlement: On October 10, 2014, the Supreme Court of British Columbia approved a settlement of a class action for people who developed granulomas after being injected with Dermalive. Dermalive is a cosmetic filler injected into the skin to smooth out wrinkles and other cosmetic defects. The settlement provides compensation to an individual who establishes that he or she was injected with Dermalive in Canada and developed granulomas in the area injected with Dermalive. Money is also available to reimburse individuals for the cost of corrective medical treatment of their granulomas (e.g., steroid injections, laser treatments, surgery, etc.). Residents of British Columbia who validly opted out of the class action on or before February 15, 2014 are not part of the settlement. Only non-BC residents who validly opted into the class action before February 15, 2014 are eligible for compensation. The settlement agreement and claim forms can be obtained from www.rosenberglaw.ca or www.kleinlyons.com

Deadline: To be eligible for compensation, the Class Member, or someone acting on his or her behalf, must complete a claim form, and have their physician complete the physician form. In addition to the claim form and physician form, the Class Member must submit copies of any medical records, receipts, or other documentation that show that they were injected with Dermalive in Canada, that they developed granulomas, and what treatment they received for the granulomas. The completed claim form, physician form, and all supporting documentation (i.e., medical records, receipts, etc.) must be delivered or postmarked to the Dermalive Class Action Claims Registry, c/o Bruneau Group, 390 Rideau St. – Box 20187, Ottawa, ON K1N 9P4, by
